DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 14-17 and 20, drawn to methods of cloning, manipulating and performing mutagenesis of a defined segment of DNA in yeast featuring a yeast-bacteria shuttle vector, classified in class 435, subclass 91.4.
- II. Claims 18-19, drawn to generating transgenic embryos or animals using the altered defined DNA segment of Group I, classified in class 800, subclass 8.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Group I and Group II are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the defined segment of DNA used in the transgenic methods of Group II can be obtained via other methods than those recited in Group I (e.g. recombination via traditional recombinant DNA technology). The subcombination has separate utility such as transfer and expression of the defined DNA segment in a different yeast cell. Thus, the inventions of Groups I and II are distinct.

Art Unit: 1636

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
